JOURNAL OF THE

AUDIO ENGINEERING SOCIETY

SUBJECT AND AUTHOR INDEX
VOLUME 25—1977 NUMBERS 1-12

SUBJECT INDEX

ACOUSTICS

Fast Room Acoustic Analyzer (FRA) Using Public Telephone Line and Computer—T. Ken Matsudaira, Tadashi Takise, Keisuke Sekiguchi, and Osamu Yamaguchi, 25:3, p. 82

Law of the First Wave Front (Feature)—Lothar Cremer, 25:6, p. 420

The Design of the Rensselaer Polytechnic Institute Acoustics Research Laboratory (Eng. Rep.)—Richard C. Cabot and Henry E. Breed, 25:7/8, p. 479

New Mobile Sound Reinforcement System for the Metropolitan Opera/New York Philharmonic Orchestra Park Concerts—Alex Rosner and Larry S. King, 25:9, p. 566

The Singapore National Stadium Sound System—J. Jacek Figwer, 25:12, p. 1016

AMPLIFIERS AND PREAMPLIFIERS

Impulse Testing and Peak Clipping—D. Preis, 25:1/2, p. 2

Transistors Can Sound Better Than Tubes (Comm.)—Dwight O. Monteith, Jr. and Richard R. Flowers, 25:3, p. 116

Comments on "Transistors Can Sound Better Than Tubes" (Comm.)—Russell O. Hamm, 25:3, p. 119

A Method for Measuring Transient Intermodulation Distortion—Eero Leinonen, Matti Otala, and John Curl, 25:4, p. 170

Public Address Systems (Reprint)—I. W. Green and J. P. Maxfield, 25:4, p. 184

Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers—W. Marshall Leach, Jr., 25:7/8, p. 466

AES

More on Problems of the Sections (Forum)—Bruce Lowell, 25:5, p. 310

56th Convention Report—25:5, p. 316

57th Convention Report—25:7/8, p. 494

58th Convention Report—25:12, p. 1046

BROADCASTING

A Proposed AM Stereo Broadcasting System—Hirotaka Kurata, Shozo Koshigoe, and Susumu Takahashi, 25:7/8, p. 450

CIRCUITS

Transistors Can Sound Better Than Tubes (Comm.)—Dwight O. Monteith, Jr. and Richard R. Flowers, 25:3, p. 116

Comments on "Transistors Can Sound Better Than Tubes" (Comm.)—Russell O. Hamm, 25:3, p. 119

Application Considerations for IC Data Converters Useful in Audio Signal Processing (Eng. Rep.)—Walter G. Jung, 25:12, p. 1033

DIGITAL

Slewing Distortion in Digital-to-Analog Conversion—Dennis M. Freeman, 25:4, p. 178

Floating-Point Encoding for Transcription of High-Fidelity Audio Signals—Francis F. Lee and David Lipschutz, 25:5, p. 266

A Microprocessor-Controlled Digital Waveform Generator (PN)—Steven Christiansen, 25:5, p. 299

The Application of Digital Techniques to the Measurement of Loudspeakers—J. M. Berman and L. R. Fincham, 25:6, p. 370

Records of the Future—Thomas G. Stockham, Jr., 25:10/11, p. 892

Application Considerations for IC Data Converters Useful in Audio Signal Processing (Eng. Rep.)—Walter G. Jung, 25:12, p. 1033

DISC RECORDING AND REPRODUCTION

Acoustical Impedance, and the Theory of Horns and of the Phonograph (Reprint)—Arthur Gordon Webster, 25:1/2, p. 24

The RCA Quadulator (PN)—G. A. Bogantz and J. F. Wells, 25:3, p. 99

Tracing Distortion Correction—E. G. Trendell, 25:5, p. 273

The Dynamic Vibration Absorber Principle, Applied to a High-Quality Phonograph Pickup—Allen R. Groh, 25:6, p. 385

Carrier Crosstalk Considerations in the CD-4 System—C. Roger Anderson, 25:7/8, p. 460

The Aspects of Low-Inertia Tone-Arm Design—Peter Rother, 25:9, p. 550

Emile Berliner, Eldridge Johnson, and the Victor Talking Machine—Edgar Hutto, Jr., 25:10/11, p. 666

The Technology of the Record Industry—Perfection Without Notice (Intro.)—Warren Rex Isom, 25:10/11, p. 674

Record Manufacturing: Making the Sound for Everyone—Joseph C. Ruda, 25:10/11, p. 702

Record Materials, Part I: Chemical Technology in the Edison Recording Industry—Leah S. Burt, 25:10/11, p. 712

Record Materials, Part II: Evolution of the Disc Talking Machine—Warren Rex Isom, 25:10/11, p. 718

Record Materials, Part III: Vinyl Compound for the Phonographic Industry—S. K. Khanna, 25:10/11, p. 724

The High-Fidelity Phonograph Transducer—B. B. Bauer, 25:10/11, p. 729

Record Changers, Turntables, and Tone Arms—A Brief Technical History—J. H. Kogen, 25:10/11, p. 749

Before the Fine Groove and Stereo Record and Other Innovations (Intro.)—Warren Rex Isom, 25:10/11, p. 815

The LP and the Single—William S. Bachman, 25:10/11, p. 821

The Coming of Stereo—H. E. Roys, 25:10/11, p. 824

The Jukebox, the Radio and the Record—A. G. Bodoh, 25:10/11, p. 836

Records of the Future—Thomas G. Stockham, Jr., 25:10/11, p. 892

DISTORTION

A Method for Measuring Transient Intermodulation Distortion—Eero Leinonen, Matti Otala, and John Curl, 25:4, p. 170

Slewing Distortion in Digital-to-Analog Conversion—Dennis M. Freeman, 25:4, p. 178

Tracing Distortion Correction—E. G. Trendell, 25:5, p. 273

Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers—W. Marshall Leach, Jr., 25:7/8, p. 466

A Catalog of Frequency and Transient Responses—D. Preis, 25:12, p. 990

EDUCATION

Teaching the Physics of Hi-Fidelity, Reprint (Forum)—Kenneth W. Johnson, Willard W. Walker, Ralph Harper, and Arthur Adams, 25:3, p. 122

The Audio Engineer—Circa 1977: What Does He (or She) Do?—DeWitt F. Morris, 25:10/11, p. 864

ELECTRONIC MUSIC

A Microprocessor-Controlled Digital Waveform Generator (PN)—Steven Christiansen, 25:5, p. 299

An Almost Locked Oscillator for Electronic Music Synthesis (PN)—James G. Simes, 25:6, p. 394

A Patchable Electronic Music Percussion Synthesizer (PN)—Brent Gabrielsen, 25:6, p. 395

A Polyphonic Music Synthesizer Utilizing Master Programmed Electronic Synthesis Modules for Each Key (Eng. Rep.)—Lee Ferguson, 25:9, p. 592

Electronic Music—Robert A. Moog, 25:10/11, p. 855

HEADPHONES

Improving the Stereo Headphone Sound Image—M. V. Thomas, 25:7/8, p. 474

HEARING

Am I Too Loud? A Symposium on Rock Music and Noise-Induced Hearing Loss (Feature)—Geoffrey L. Wilson, Keith Attenborough, Richard N. Galbraith, William F. Rintelmann and Gordon R. Bienvenue, and Jack I. Shampan, 25:3, p. 126

Creating Source Elevation Illusions by Spectral Manipulation—P. Jeffrey Bloom, 25:9, p. 560

Measuring the Constants of Ear Simulators—M. D. Burkhard, 25:12, p. 1008

HISTORY OF SOUND RECORDING

The Bark Heard 'Round the World (Feature)—Oliver Berliner, 25:7/8, p. 528

Before the Phonograph (Foreword)—Warren Rex Isom, 25:10/11, p. 656

A Wonderful Invention But Not a Breakthrough (Intro.)—Warren Rex Isom, 25:10/11, p. 657

Edison and his Contributions to the Record Industry—Walter W. Welch, 25:10/11, p. 660

Emile Berliner, Eldridge Johnson, and the Victor Talking Machine—Edgar Hutto, Jr., 25:10/11, p. 666

The Technology of the Record Industry—Perfection Without Notice (Intro.)—Warren Rex Isom, 25:10/11, p. 674

Microphones for Recording—Harry F. Olson, 25:10/11, p. 676

Loudspeakers—John Eargle, 25:10/11, p. 685

Magnetic Recording for Original Recordings—John T. Mullin, 25:10/11, p. 696

Record Manufacturing: Making the Sound for Everyone—Joseph C. Ruda, 25:10/11, p. 702

Record Materials, Part I: Chemical Technology in the Edison Recording Industry—Leah S. Burt, 25:10/11, p. 712

Record Materials, Part II: Evolution of the Disc Talking Machine—Warren Rex Isom, 25:10/11, p. 718

Record Materials, Part III: Vinyl Compound for the Phonographic Industry—S. K. Khanna, 25:10/11, p. 724

The High-Fidelity Phonograph Transducer—B. B. Bauer, 25:10/11, p. 729

Record Changers, Turntables, and Tone Arms—A Brief Technical History—James H. Kogen, 25:10/11, p. 749

Electronic Home Music Reproducing Equipment—Daniel R. von Recklinghausen, 25:10/11, p. 759

Home Music Reproducing Equipment—Performance and Styling, M. L. Alexander, 25:10/11, p. 772

Great Music for All and for All Occasions (Intro.)—Warren Rex Isom, 25:10/11, p. 777

The Graphic Arts and the Record Industry—Lewis Garlick, 25:10/11, p. 779

Mechanical Sound Recording in Czechoslovakia—Jiří Struska, 25:10/11, p. 809

Before the Fine Groove and Stereo Record and Other Innovations (Intro.)—Warren Rex Isom, 25:10/11, p. 815

The LP and the Single—William S. Bachman, 25:10/11, p. 821

The Coming of Stereo—H. E. Roys, 25:10/11, p. 824

Magnetic Tape Recording—Reels, Cassettes, or Cartridges?—Oscar P. Kusisto, 25:10/11, p. 828

The Jukebox, the Radio and the Record—A. G. Bodoh, 25:10/11, p. 836

The Art of Becoming a Creative Member of the Record Industry Has Become a Science (Intro.)—Warren Rex Isom, 25:10/11, p. 862

Recording, Art of the Century?—Peter K. Burkowitz, 25:10/11, p. 873

The Musician and the Record—Emil L. Torick, 25:10/11, p. 880

The Great Artists—John F. Pfeiffer, 25:10/11, p. 885

100 Years of Phonography—H.-W. Steinhausen, 25:10/11, p. 896

LOUDSPEAKERS

Analysis of Decoupled-Cone Loudspeakers—James M. Kates, 25:1/2, p. 15

Acoustical Impedance, and the Theory of Horns and of the Phonograph (Reprint)—Arthur Gordon Webster, 25:1/2, p. 24

Comments on "The Use of Fibrous Materials in Loudspeaker Enclosures" (Forum)—J. Catrysse, 25:3, p. 121

Reply to Comments on "The Use of Fibrous Materials in Loudspeaker Enclosures" (Forum)—L. J. S. Bradbury, 25:3, p. 122

Public Address Systems (Reprint)—I. W. Green and J. P. Maxfield, 25:4, p. 184

A Novel Approach to Linear Phase Loudspeakers Using Passive Crossover Networks (PN)—Erik Baekgaard, 25:5, p. 284

Design Problems of High-Level Cone Loudspeakers (PN)—John R. Gilliom, Paul L. Boliver, and Lucia C. Boliver, 25:5, p. 294

The Application of Digital Techniques to the Measurement of Loudspeakers—J. M. Berman and L. R. Fincham, 25:6, p. 370

A New Set of Vented Loudspeaker Alignments (PN)—W. J. J. Hoge, 25:6, p. 391

The Function and Design of Horns for Loudspeakers (Reprint)—C. R. Hanna and J. Slepian, 25:9, p. 573

Loudspeakers—John Eargle, 25:10/11, p. 685

MAGNETIC RECORDING AND REPRODUCTION

Magnetic Recording for Original Recordings—John T. Mullin, 25:10/11, p. 696

Magnetic Tape Recording—Reels, Cassettes, or Cartridges?—Oscar P. Kusisto, 25:10/11, p. 828

Eddy Currents in Composite Laminations (Reprint)—E. Peterson and L. R. Wrathall, 25:12, p. 1026

A Uniform Track-Positioning and Dimensioning System for Magnetic Recording (Comm.)—E. R. Hanson, 25:12, p. 1041

MEASUREMENTS AND INSTRUMENTATION

Impulse Testing and Peak Clipping—D. Preis, 25:1/2, p. 2

Fast Room Acoustic Analyzer (FRA) Using Public Telephone Line and Computer—T. Ken Matsudaira, Tadashi Takise, Keisuke Sekiguchi, and Osamu Yamaguchi, 25:3, p. 82

The Design of the Rensselaer Polytechnic Institute Acoustics Research Laboratory (Eng. Rep.)—Richard C. Cabot and Henry E. Breed, 25:7/8, p. 479

A Catalog of Frequency and Transient Responses—D. Preis, 25:12, p. 990

Tracking Measurement Technique for Compressors, Expandors, Limiters, . . . (PN)—Craig C. Todd, 25:12, p. 1039

MICROPHONES

Far-Field Placement of Mono Microphones (Forum)—James B. Lee, 25:1/2, p. 38

Public Address Systems (Reprint)—I. W. Green and J. P. Maxfield, 25:4, p. 184

A Low-Noise High-Output Capacitor Microphone System—Richard S. Burwen, 25:5, p. 278

Microphones for Recording—Harry F. Olson, 25:10/11, p. 676

MULTICHANNEL

Ambience-Related Transmission Systems (PN)—Hans Lauterslager and Peter H. C. Nuyten, 25:1/2, p. 29

A Dynamic Noise Reducer for Sum-Difference Multiplex Systems—Richard C. Cabot, 25:3, p. 95

Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Jerry Mintor, 25:7/8, p. 492

Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Glenn White, 25:7/8, p. 492

Reply to Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Richard C. Cabot, 25:7/8, p. 492

The RCA Quadulator (PN)—G. A. Bogantz and J. F. Wells, 25:3, p. 99

Localization of Lateral Phantom Sources (PN)—G. Thiele and G. Plenge, 25:4, p. 196

Criteria for Evaluating Surround-Sound Systems (Comm.)—Michael A. Gerzon, 25:6, p. 400

A Proposed AM Stereo Broadcasting System—Hirotaka Kurata, Shozo Koshigoe, and Susumu Takahashi, 25:7/8, p. 450

Carrier Crosstalk Considerations in the CD-4 System—C. Roger Anderson, 25:7/8, p. 460

Improving the Stereo Headphone Sound Image—M. V. Thomas, 25:7/8, p. 474

Quadraphony—A Review—J. G. Woodward, 25:10/11, p. 843

PSYCHOACOUSTICS

Ambience-Related Transmission Systems (PN)—Hans Lauterslager and Peter H. C. Nuyten, 25:1/2, p. 29

Localization of Lateral Phantom Sources (PN)—G. Thiele and G. Plenge, 25:4, p. 196

Criteria for Evaluating Surround-Sound Systems (Comm.)—Michael A. Gerzon, 25:6, p. 400

Creating Source Elevation Illusions by Spectral Manipulation—P. Jeffrey Bloom, 25:9, p. 560

RECORD INDUSTRY

The Technology of the Record Industry—Perfection Without Notice (Intro.)—W. R. Isom, 25:10/11, p. 674

The Graphic Arts and the Record Industry—Lewis Garlick, 25:10/11, p. 779

The Record Industry in the United States—Stephen Traiman, 25:10/11, p. 785

The Record Industry in Europe—Peter Jones, 25:10/11, p. 789

The Record Industry in Latin America—George M. Tavares, 25:10/11, p. 795

Far East—Problems and Growth Potential—Tokugen Yamamoto, 25:10/11, p. 800

The Recording Industry in Japan—Toshiya Inoue, 25:10/11, p. 802

Corroboree and Other Music—Ray Darnell, 25:10/11, p. 813

The Art of Becoming a Creative Member of the Record Industry Has Become a Science (Intro.)—Warren Rex Isom, 25:10/11, p. 862

The Audio Engineer—Circa 1977: What Does He (or She) Do?—DeWitt F. Morris, 25:10/11, p. 864

The Musician and the Record—Emil L. Torick, 25:10/11, p. 880

The Great Artists—John F. Pfeiffer, 25:10/11, p. 885

RECORDING STUDIO TECHNIQUES AND EQUIPMENT

Instrument Isolation for Multiple Track Recording

(PN)—M. Rettinger, 25:1/2, p. 34

Far-Field Placement of Mono Microphones (Forum)—James B. Lee, 25:1/2, p. 38

A Dynamic Noise Reducer for Sum-Difference Multiplex Systems—Richard C. Cabot, 25:3, p. 95

Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Jerry Mintor, 25:7/8, p. 492

Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Glenn White, 25:7/8, p. 492

Reply to Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Richard C. Cabot, 25:7/8, p. 492

How to Fool the Ear and Make Bad Recordings (Comm.)—Svein Erik Børja, 25:7/8, p. 482

Studios and Studio Equipment—John Borwick, 25:10/11, p. 689

Recording, Art of the Century?—Peter K. Burkowitz, 25:10/11, p. 873

Tracking Measurement Technique for Compressors, Expandors, Limiters, . . . (PN)—Craig C. Todd, 25:12, p. 1039

SOUND REINFORCEMENT

Communication System for a Performing Arts Center (PN)—Philip B. Clark and David R. Torrey, 25:3, p. 106

Public Address Systems (Reprint)—I. W. Green and J. P. Maxfield, 25:4, p. 184

Moving Sound Image in the Theaters (PN)—Juhani Borenius, 25:4, p. 200

Law of the First Wave Front (Feature)—Lothar Cremer, 25:6, p. 420

New Mobile Sound Reinforcement System for the Metropolitan Opera/New York Philharmonic Orchestra Park Concerts—Alex Rosner and Larry S. King, 25:9, p. 566

A Multiplexed Remote-Control System (Eng. Rep.)—D. M. Jacobson and R. N. Crowley, 25:9, p. 586

The Singapore National Stadium Sound System—J. Jacek Figwer, 25:12, p. 1016

STANDARDS

IEC Meeting Notes: Ottawa Meeting (Standards)—Edward R. Hanson, 25:1/2, p. 40

A Uniform Track-Positioning and Dimensioning System for Magnetic Recording (Comm.)—E. R. Hanson, 25:12, p. 1041

AUTHOR INDEX

Adams, Arthur—(see Johnson, Kenneth W.), 25:3, p. 122

Alexander, M. L.—Home Music Reproducing Equipment—Performance and Styling, 25:10/11, p.772
